

PIYUSH KAPOOR

React JS Lead | Frontend Architecture | Web Platforms | Banking and Enterprise Apps

Riyadh, Saudi Arabia | +91 8284824898 | +966 567113534 | piyushkapoor786@gmail.com | linkedin.com/in/piyush-kapoor-27839117

PROFESSIONAL SUMMARY

Hands-on React JS Lead with 12+ years of software engineering experience delivering banking, payments, insurance, and enterprise web platforms. Strong in React.js architecture, component-driven UI, state management, API integration, frontend delivery governance, release management, stakeholder collaboration, and leading teams across complex product workstreams.

WORK HISTORY

Innovations Group KSA / Country Arab House

Technical Lead | Riyadh, Saudi Arabia | Apr 2023 - Present

- Lead web platform delivery for banking and payments journeys using React.js front ends integrated with Spring Boot microservices and REST APIs.
- Own frontend architecture, reusable component patterns, API integration contracts, secure workflow implementation, and production stability across 10 business journeys.
- Lead cross-functional delivery across backend, mobile, web, QA, and product teams for banking and payments platforms.
- Manage 8 engineers while driving HLD, LLD, sprint planning, code reviews, release governance, engineering standards, and production support.
- Own service boundaries, API contracts, integration patterns, secure workflows, release readiness, incident response, and stakeholder alignment across 3 parallel workstreams.

AU Bank

Technical Lead | Jaipur, India | Jan 2023 - Mar 2023

- Led React.js web delivery for a merchant banking platform covering onboarding, account servicing, lending, and operational workflows.
- Led a time-bound merchant banking platform engagement covering onboarding, account servicing, lending, and operational workflows.
- Directed 6 engineers across frontend, mobile, and backend workstreams while defining architecture decisions, integration patterns, API contracts, and release priorities.
- Delivered 4 high-priority milestones through hands-on technical guidance, business logic implementation, API troubleshooting, and release coordination.

Xebia IT Architects

Technical Lead | Gurugram, India | Jul 2020 - Dec 2022

- Led frontend and full-stack delivery across fintech and enterprise platforms, including YES Bank and livi Bank.
- Led fintech and enterprise delivery for YES Bank, livi Bank, and related platforms across distributed engineering teams.
- Owned architecture for 10 services and integrations, reusable design patterns, API contracts, delivery models, and maintainability improvements.
- Mentored 12 engineers and coordinated with client stakeholders, QA, backend, mobile, web, and product teams to deliver 6 workstreams and release milestones.

Esolutions

Senior Software Engineer | Gurugram, India | Jun 2018 - Jun 2020

- Built React.js web applications integrated with Java backend services across insurance, analytics, and content platforms.
- Built enterprise applications using Java backend services, REST APIs, React.js, Angular, and AEM-based experiences.
- Delivered reusable frontend/backend modules, API integration, scenario-driven digital flows, and production-ready application features.

Ameba Software Solutions

Software Engineer | Chandigarh, India | Apr 2016 - Jun 2018

- Developed full-stack web application modules using Java, JavaScript, SQL, and REST API integrations for education and enterprise clients.

- Built reusable components, widget-based features, enhancements, bug fixes, and client-specific workflows.

PMASS INDIA

Software Developer | Ludhiana, India | Jan 2014 - Apr 2016

- Developed business application modules using Java, SQL, JavaScript, HTML, and CSS for internal business workflows.
- Supported feature delivery, issue resolution, and collaborative development practices.

SKILLS

- **React JS:** React.js, JavaScript, TypeScript, Redux, Redux Toolkit, React Router, Axios, Context API, React Hook Form
- **Frontend Engineering:** Component-Based Architecture, Reusable UI Components, Responsive UI, HTML5, CSS3, Bootstrap, Form Workflows, Browser Debugging
- **API and Backend Integration:** REST APIs, API Contracts, Java, Spring Boot, Microservices, Spring Security, MySQL, MongoDB
- **Quality and Tooling:** Jest, React Testing Library, ESLint, Git, GitHub, GitHub Actions, Jenkins, CI/CD, Docker
- **Architecture and Process:** Frontend Architecture, HLD, LLD, Agile/Scrum, Sprint Planning, JIRA, Confluence, Code Reviews, Release Management
- **Leadership:** Team Mentoring, Stakeholder Communication, Estimation, Technical Governance, Production Support, Performance Optimization

EDUCATION

Bachelor of Technology in Information Technology

Guru Nanak Dev Engineering College, Ludhiana

SELECTED PROJECTS

YES API HUB

YES API HUB aligns with YES BANK's public API Developer Portal, where partners can explore API products and construct application experiences using the bank's API ecosystem. The solution was built using React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs, reusable UI modules. In this project, I set up application architecture, delivered React.js screens, created reusable UI behavior, integrated APIs, and solved critical frontend functionality. Digitized partner-facing API banking journeys in a way that aligns with YES BANK's public API portal positioning for API products and partner application enablement.

AU Merchant / AU 0101 Business Platform

AU 0101 Business is AU Small Finance Bank's business banking app for current account and business banking users, supporting merchant QR self-onboarding, QR collections, real-time settlement, account servicing, loans, cards, GST payments, investments, and business transaction management. The solution was built using React.js, JavaScript, Node.js, Express.js, MySQL, microservices, REST APIs, React Native-supported flows. In this project, I led React.js web delivery, component structure, form-heavy workflows, validation behavior, API integration, and user journey implementation. Delivered merchant and business banking capabilities aligned with AU's public AU 0101 Business and merchant-payment-service positioning for digital-first business banking.

FWD Group Insurance Platform

FWD Group is a digital-focused insurer whose public positioning emphasizes technology-enabled insurance experiences, customer empowerment, and changing how people feel about insurance. The solution was built using React.js, JavaScript, Node.js, Express.js, MySQL, REST APIs, JSON-driven UI rendering. In this project, I built React.js web experiences, implemented dynamic UI behavior, integrated service responses, and created reusable frontend patterns. Delivered responsive insurance journeys aligned with FWD's public digital-insurance direction, where customer experiences adapt to data and service-driven scenarios.

NCAP

NCAP is an NIIT course/content authoring and documentation platform, publicly reflected through NCAP course-preview and user-guide material for creating, previewing, and managing structured educational content. The solution was built using JavaScript, Node.js, Express.js, MongoDB, dynamic widgets, reusable web modules. In this project, I led core JavaScript development, widget-based UI features, reusable web behavior, team coordination, and course/document workflow implementation. Delivered a configurable education-content platform aligned with the available NCAP guide material for course creation, previewing, documentation, and reusable learning workflows.

AT&T Cirrus Portal

Cirrus analytics and AT&T analytics portal references point to monitoring and analytics experiences for viewing reports, network or operational metrics, resource utilization, alarms, and improvement opportunities. The solution was built using Angular, JavaScript,

Node.js, Express.js, PostgreSQL, reusable web analytics modules. In this project, I contributed to frontend delivery, data-driven screens, reusable web modules, service integration, and development acceleration. Helped deliver a monitoring and analytics portal aligned with public Cirrus/AT&T analytics concepts around reports, operational visibility, and improvement analysis.

Tetra Pak WEB

Tetra Pak's public web presence presents food processing, packaging, services, automation, digital solutions, sustainability, and industry content through a structured corporate website experience. The solution was built using React.js, Redux, AEM, JavaScript, reusable components, content-driven web modules. In this project, I worked on React components, Redux state handling, AEM integration, reusable page behavior, and frontend quality. Supported a maintainable corporate web platform aligned with Tetra Pak's public content model for solutions, services, industry information, and digital product storytelling.

DOMAINS

- Banking, Payments, Insurance, Enterprise Platforms, B2B Platforms, Merchant Banking, Internal Operations
