

# PIYUSH KAPOOR

**Technical Lead | React Native | Mobile Architecture | API Integration | Cross-Platform Apps**

Riyadh, Saudi Arabia | +91 8284824898 | +966 567113534 | piyushkapoor786@gmail.com | linkedin.com/in/piyush-kapoor-27839117

## PROFESSIONAL SUMMARY

Technical Lead with 12+ years of software engineering experience and strong delivery focus on React Native mobile applications for banking, payments, and enterprise platforms. Skilled in mobile architecture, secure workflow design, REST API integration, release management, and engineering leadership across teams of 5-10 engineers.

## WORK HISTORY

### Innovations Group KSA / Country Arab House

*Technical Lead | Riyadh, Saudi Arabia | Apr 2023 - Present*

- Lead React Native architecture and mobile application delivery for banking and payments journeys backed by Spring Boot microservices and REST APIs across 10 business journeys.
- Own mobile API integration patterns, secure workflow implementation, and production stability across 15 internal and external integrations.
- Lead cross-functional delivery across backend, mobile, web, QA, and product teams for banking and payments platforms.
- Manage 8 engineers while driving HLD, LLD, sprint planning, code reviews, release governance, engineering standards, and production support.
- Own service boundaries, API contracts, integration patterns, secure workflows, release readiness, incident response, and stakeholder alignment across 3 parallel workstreams.

### AU Bank

*Technical Lead | Jaipur, India | Jan 2023 - Mar 2023*

- Led React Native mobile architecture and delivery for a merchant banking platform backed by Spring Boot microservices and shared REST APIs.
- Led a time-bound merchant banking platform engagement covering onboarding, account servicing, lending, and operational workflows.
- Directed 6 engineers across frontend, mobile, and backend workstreams while defining architecture decisions, integration patterns, API contracts, and release priorities.
- Delivered 4 high-priority milestones through hands-on technical guidance, business logic implementation, API troubleshooting, and release coordination.

### Xebia IT Architects

*Technical Lead | Gurugram, India | Jul 2020 - Dec 2022*

- Led React Native delivery across fintech and enterprise platforms, including YES Bank and Ivi Bank, with Spring Boot microservices as the backend foundation.
- Led fintech and enterprise delivery for YES Bank, Ivi Bank, and related platforms across distributed engineering teams.
- Owned architecture for 10 services and integrations, reusable design patterns, API contracts, delivery models, and maintainability improvements.
- Mentored 12 engineers and coordinated with client stakeholders, QA, backend, mobile, web, and product teams to deliver 6 workstreams and release milestones.

### Esolutions

*Senior Software Engineer | Gurugram, India | Jun 2018 - Jun 2020*

- Built enterprise applications using Java backend services, REST APIs, React.js, Angular, and AEM-based experiences.
- Delivered reusable frontend/backend modules, API integration, scenario-driven digital flows, and production-ready application features.

### Ameba Software Solutions

*Software Engineer | Chandigarh, India | Apr 2016 - Jun 2018*

- Developed full-stack web application modules using Java, JavaScript, SQL, and REST API integrations for education and enterprise clients.
- Built reusable components, widget-based features, enhancements, bug fixes, and client-specific workflows.

## PMASS INDIA

*Software Developer | Ludhiana, India | Jan 2014 - Apr 2016*

- Developed business application modules using Java, SQL, JavaScript, HTML, and CSS for internal business workflows.
- Supported feature delivery, issue resolution, and collaborative development practices.

## SKILLS

- **React Native and Mobile:** React Native, JavaScript, TypeScript, Redux, Redux Toolkit, React Navigation, React Hook Form, Context API, Axios, Expo, Jest, React Testing Library
- **Mobile Architecture and Delivery:** Mobile Application Architecture, API Integration, Secure Workflow Implementation, Role-Based Access Flows, Mobile Journey Design, Cross-Platform App Development
- **Backend Integration:** Java, Spring Boot, REST APIs, Microservices, Spring Security, API Contracts, MySQL, MongoDB, Firebase
- **Supporting Frontend:** React.js, React Router, HTML5, CSS3, Bootstrap
- **Tools and Process:** Git, GitHub, GitHub Actions, Jenkins, Docker, CI/CD, AWS, Firebase, HLD, LLD, Code Reviews, Agile Delivery, Release Management, Production Support

## EDUCATION

### Bachelor of Technology in Information Technology

*Guru Nanak Dev Engineering College, Ludhiana*

## SELECTED PROJECTS

### SAIB Travel Application

SAIB Travel is a customer-facing travel banking app from The Saudi Investment Bank, supporting online account opening, digital Travel Card issuance, spending in 100+ foreign currencies, transfers, e-statements, digital wallets, rewards, and additional family cards. The solution was built using React Native, JavaScript, Node.js, Express.js, MongoDB, microservices, REST APIs. In this project, I built and supported React Native mobile journeys, API integration, secure customer workflows, cross-platform behavior, troubleshooting, and release readiness. Helped deliver a customer-facing travel banking experience closely aligned with SAIB's public Travel App proposition for secure, flexible, multi-currency mobile banking.

### IRIS by YES BANK - Mobile App

IRIS by YES BANK is YES BANK's mobile banking app for 24x7 digital banking, payments, bill pay, money transfers, digital savings account journeys, credit card and loan-related services, biometric login, and secure customer banking. The solution was built using React Native, JavaScript, Node.js, Express.js, MySQL, microservices, REST APIs. In this project, I set up the React Native application architecture and provided solutions for major mobile features, API integration, and critical customer workflows. Enabled a cross-platform mobile banking experience that aligns with IRIS's public positioning as a secure, feature-rich digital banking app for customer financial journeys.

### AU Merchant / AU 0101 Business Platform

AU 0101 Business is AU Small Finance Bank's business banking app for current account and business banking users, supporting merchant QR self-onboarding, QR collections, real-time settlement, account servicing, loans, cards, GST payments, investments, and business transaction management. The solution was built using React Native, React.js, JavaScript, Node.js, Express.js, MySQL, microservices, REST APIs. In this project, I set up mobile architecture, solved critical React Native features, integrated APIs, and coordinated merchant mobile workflows with backend services. Delivered merchant and business banking capabilities aligned with AU's public AU 0101 Business and merchant-payment-service positioning for digital-first business banking.

### YES API HUB

YES API HUB aligns with YES BANK's public API Developer Portal, where partners can explore API products and construct application experiences using the bank's API ecosystem. The solution was built using React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs, service-driven workflows. In this project, I supported workflow design, API integration patterns, reusable frontend behavior, and cross-channel banking journey thinking. Digitized partner-facing API banking journeys in a way that aligns with YES BANK's public API portal positioning for API products and partner application enablement.

### NCAP

NCAP is an NIIT course/content authoring and documentation platform, publicly reflected through NCAP course-preview and user-guide material for creating, previewing, and managing structured educational content. The solution was built using JavaScript, Node.js, Express.js, MongoDB, reusable application widgets, API-backed modules. In this project, I applied modular JavaScript application patterns to reusable features, API-driven flows, and cross-platform style thinking for education workflows. Delivered a configurable education-content platform aligned with the available NCAP guide material for course creation, previewing, documentation, and reusable learning workflows.

## **FWD Group Insurance Platform**

FWD Group is a digital-focused insurer whose public positioning emphasizes technology-enabled insurance experiences, customer empowerment, and changing how people feel about insurance. The solution was built using React.js, JavaScript, Node.js, Express.js, MySQL, REST APIs, scenario-based application behavior. In this project, I applied frontend and API integration experience to reusable application behavior, data-driven screens, and service-backed digital flows. Delivered responsive insurance journeys aligned with FWD's public digital-insurance direction, where customer experiences adapt to data and service-driven scenarios.

## **DOMAINS**

- Banking, Payments, Mobile Banking Applications, Enterprise Platforms, B2B Platforms
